

## Directory Opus installation

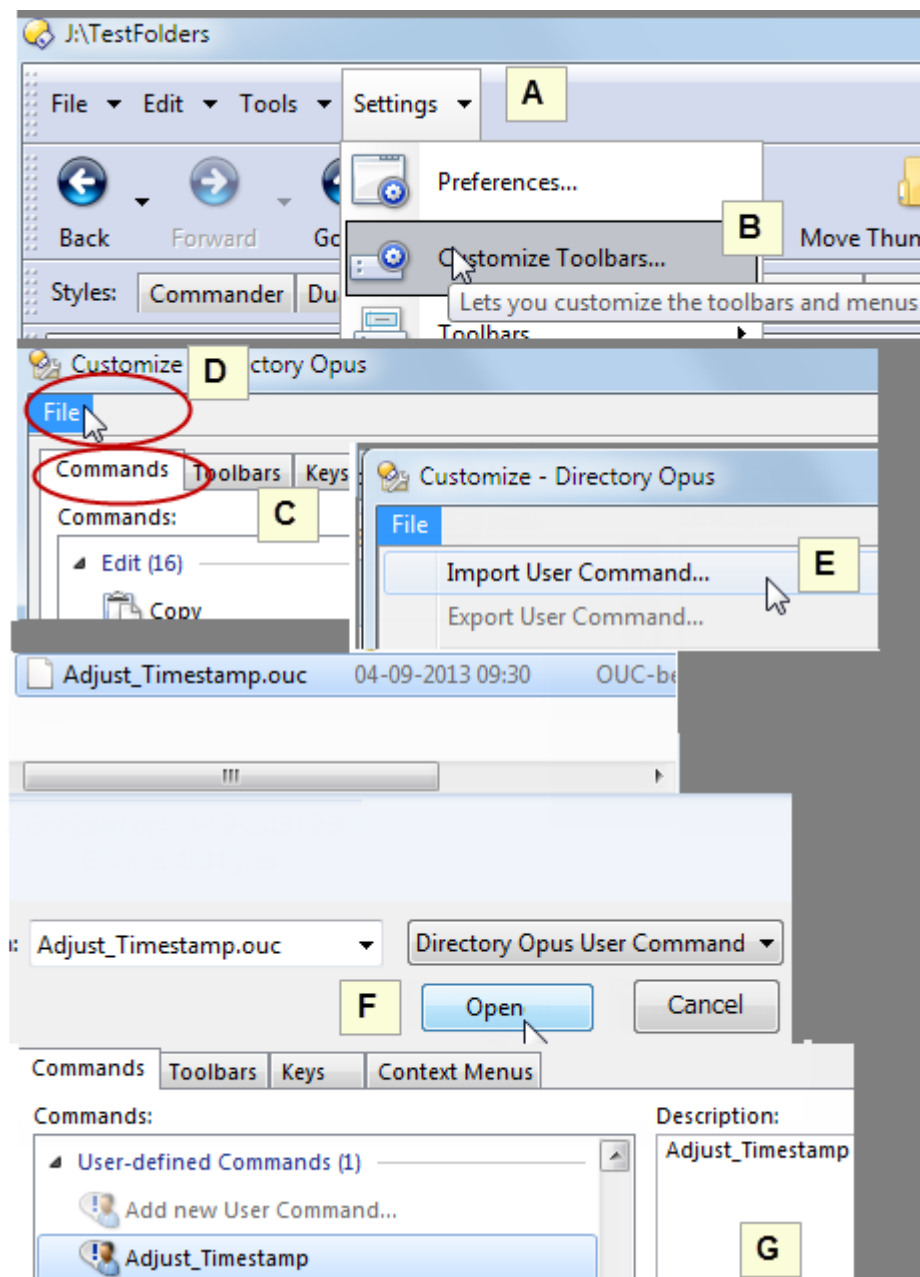

### 1. Download/install

- Download and unzip the zip-file.
  - Within Directory Opus program folder: Create a SetFolDate folder
  - Copy SetFolDateFM.exe (from the zip file) into that folder
  - Double click SetFolDateFM.exe
  - A file **Adjust\_Timestamp.ouc** will be created and placed on desktop
  - Move this .ouc –file to Directory Opus program folder
- This file is needed for creating an item in the context menu (see below)

### 2. Contextmenu Importing the Adjust\_Timestamp.ouc as user defined command

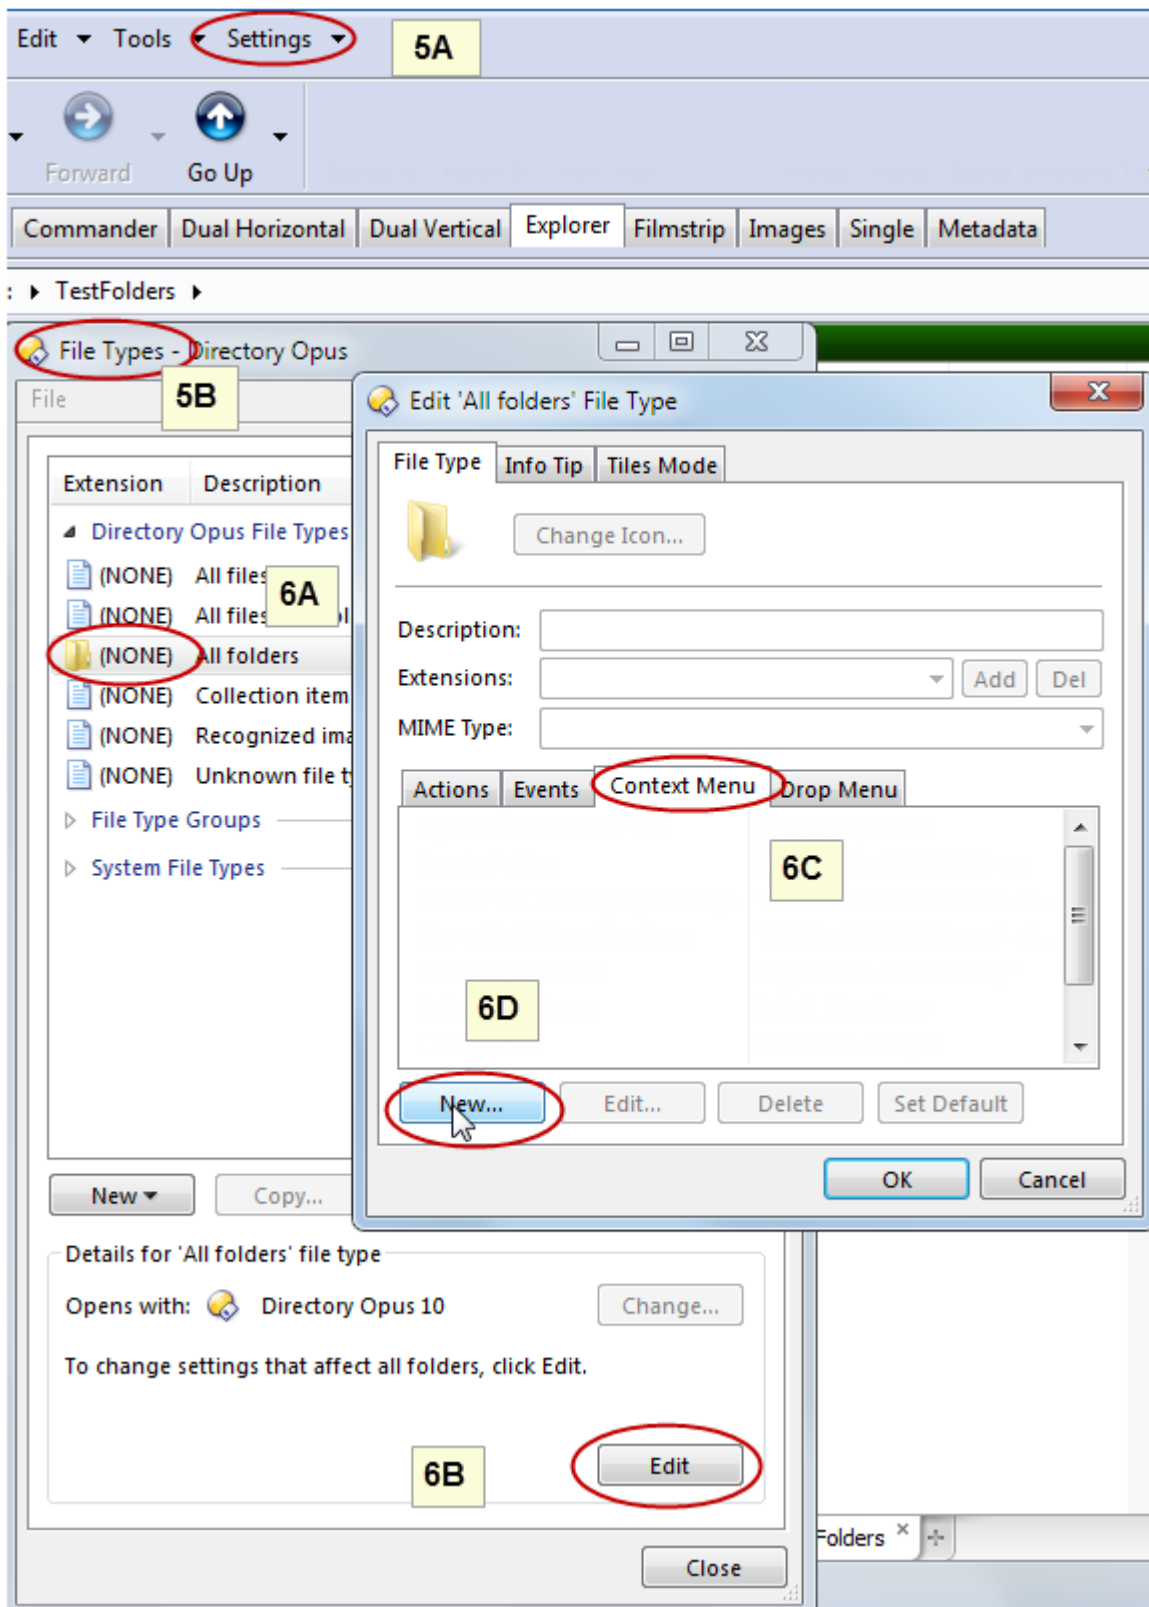

1. Click on: **Settings** (A) select **Customize Toolbars** (B) select **tab Commands** (C)
2. Click on: **File** (D) select: **Import User Command** (E)
3. Go to and Open **Adjust\_Timestamp.ouc** – click **Open** (F)
4. Note under User-defined Commands "Adjust\_Timestamp" has been added (G)

=

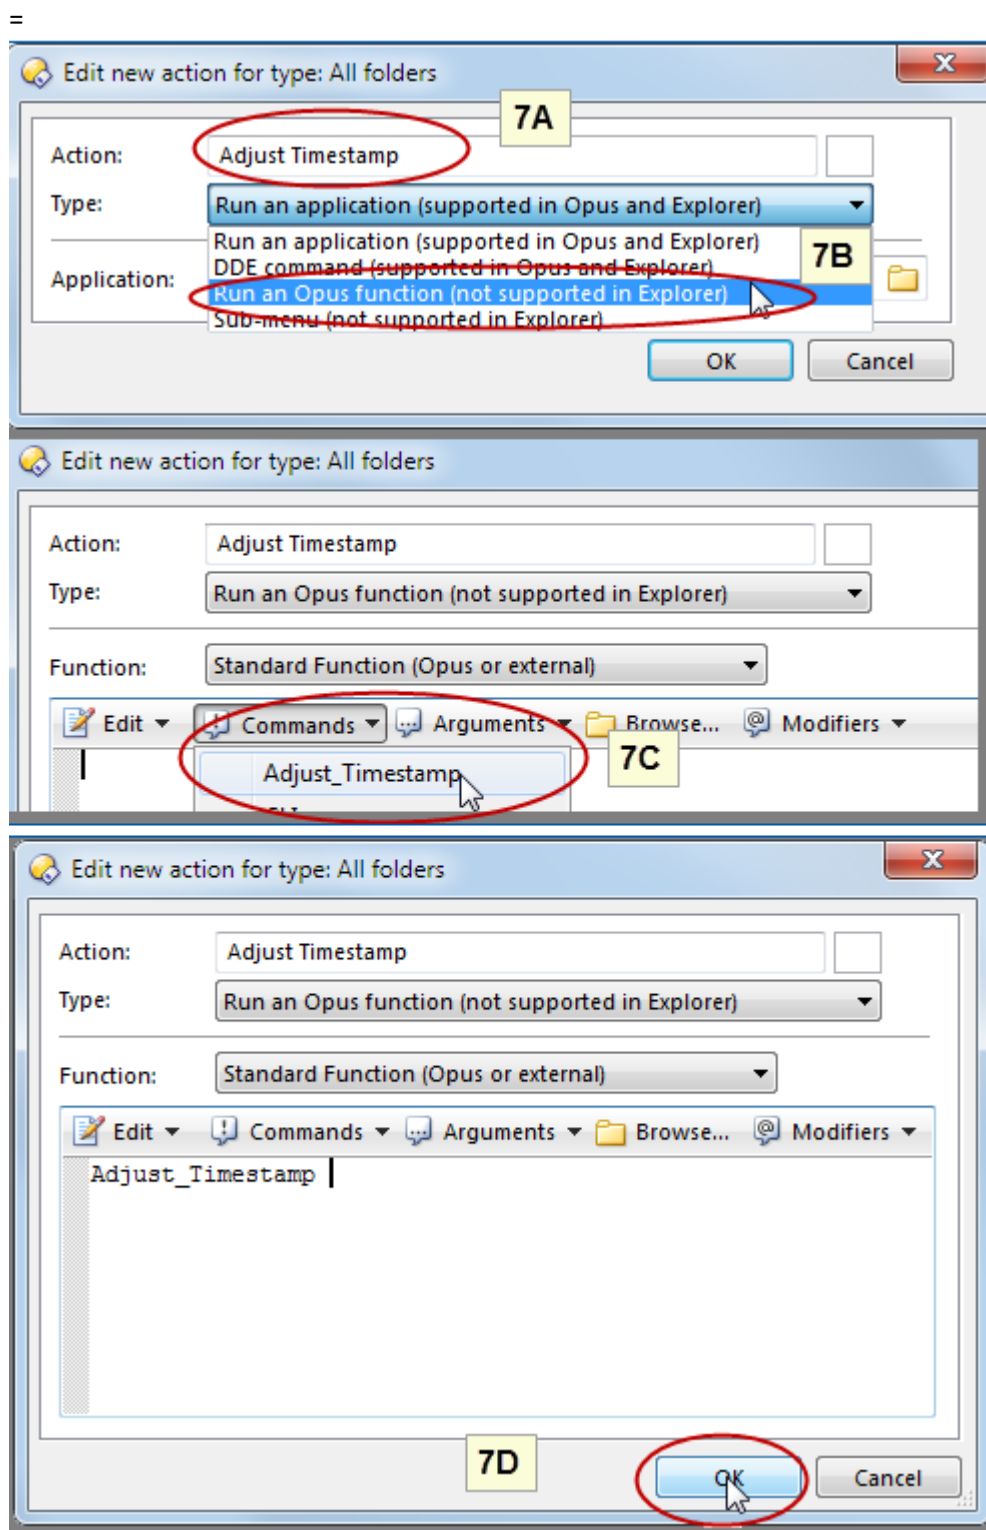

5. Click on: **OK**

6. Click on: **Settings**, (5A) select: **File Types** (5B)
7. Click on: (NONE) **All folders** (6A),  
click on **Edit** (6B)  
select tab **Context Menu** (6C)  
click on "**New...**" (6D)

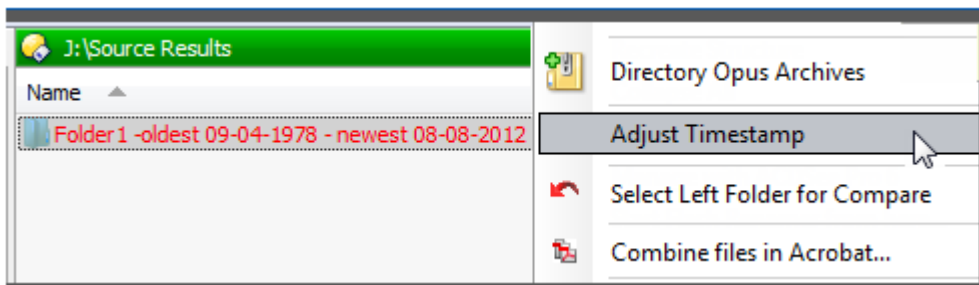

7. Enter title: **Adjust Timestamp** (A),  
click on **Drop down** menu & select "**Run an Opus function (not supported in Explorer)**", (B)  
click on **Commands** and select **Adjust Timestamp** (C) from the list  
click on "**OK**" (D)

8. Click "**OK**"

9. Note a new context menu has been added, click on "**OK**" - next window click on "**Close**"  
10. Note the new Adjust Timestamp entry.

=

### 3) **TOOLBAR-BUTTON** Add toolbar button to Directory Opus

1. Click on "Settings", select "Customize Toolbars"
2. "Rightclick" anywhere on the "toolbar", select "New" > "New Button"
3. "Rightclick" on "New button", select "Edit..."
4. Enter Label-text, e.g. Adjust Timestamp, and (Optional) Tip-text,
5. **Function:** Browse to "SetFolDateFM.exe"-file and add {ss} {Os} as parameters  
X:\path\SetFolDateFM.exe {ss} {Os} (x = driveletter and path=path to Setfoldatefm.exe)  
So you get something like this: (don't forget the quotes)  
"C:\Program Files\GPSoftware\Directory Opus\SetFolDate\SetFolDateFM.exe" {ss} {Os}  
click "OK"
6. Note the button. (.ico is available in the SetFolDate folder)
